

United States Navy

Case Study

Mission

The mission of the Navy is to maintain, train and equip combat-ready Naval forces capable of winning wars, deterring aggression and maintaining freedom of the seas.

In supporting the mission of the United States Navy, Titania provided enterprise level support services to the Department of the Navy Assistant for Administration (DON/AA) for existing ASP.NET, C#, SharePoint, Java web-based, and client-server applications.

Additionally, they provided system administration on the DON/AA Information Technology Division cloud-based environments in the Defense Information Systems Agency (DISA) MILCLOUD, SPAWAR private web services, and AWS cloud public facing web service in the .mil global top-level domain. Titania also directly supports the Secretariat IT systems and networks by performing computer network vulnerability testing ensuring the security of these systems.

Contracts

SeaPort Next Generation (SeaPort – NxG)

TSeaPort-NxG is the Navy's electronic platform for acquiring support services in 23 functional areas including Engineering, Financial Management, and Program Management

The Navy Systems Commands (NAVSEA, NAVAIR, NAVWAR, NAVFAC, and NAVSUP), the Office of Naval Research (ONR), Military Sealift Command (MSC), and the United States Marine Corps (USMC) compete their service requirements amongst 1800+ SeaPort-NxG Indefinite Delivery Indefinite Quantity (IDIQ) multiple award contract holders. SeaPort-NxG provides an efficient and effective means of contracting for professional support services and enhancing small business participation. The Navy conducts Rolling Admissions to allow new industry partners the opportunity to participate. Updates to the Rolling Admissions schedule are posted on this website as well as FedBizOpps.

About Titania

Founded in 2012, Titania delivers valued services to the federal government in support of their most critical missions. In 2020, the company was acquired by Swish Data and operates as an independent business subsidiary. Titania professional services include operational intelligence and training, program and data management, test and evaluation, and healthcare information technology. Their services team is comprised of highly qualified retired military and civilian agency personnel that maintain a deep understanding of government systems, programs and processes. Adhering to established standards and best practices, Titania provides identifiable and repeatable IT services that can be seamlessly integrated into any environment.
