

Operational Intelligence and Training

Our dedication to excellence, coupled with our respective experience in uniform, government service, and engineering services, provides us with a unique perspective to address our clients' challenges.

Titania possesses superior capabilities and competencies, delivering world-class operational intelligence and training support. Similarly, Titania provides expert intelligence analysts that harvest, review, and handle information, facilitating our approach to supporting real-world missions and providing research and analysis to the Army's synthetic training scenarios.

Titania plays a critical role in designing, developing, and integrating training events and solutions in support of the U.S. Army Intelligence Center of Excellence (USAICoE), Training & Doctrine Command's (TRADOC) G2, Army units in garrison. Our Subject Matter Experts (SMEs) and software engineers deliver exceptional research, analysis, and development, thus allowing for integration of products, encompassing the training information infrastructure, materials, services, and facilities to enable training that develops and sustains Soldier and Leader competence across all training domains.

Our experienced SMEs include: professionals with international, joint, and coalition experience; specialized SMEs from academia; nationally published Cyber experts; skilled analysts in every intelligence domain; and combat arms experts. We deliver un-replicated, distinctive, and valuable knowledge and skills.

Capabilities

- Intelligence Analysis & Support (all INTs)
- Culture Analysis (research, reporting, training)
- Data Analytics and Informatics
- Operational Training (in-residence, mobile, distance learning, and Train-the-Trainer)
- Analytic Tradecraft Instruction
- Instructional Systems Design (ISD) (platform and scenario based)
- Courseware Development (using a variety of ISD approaches)
- SharePoint Design, Architecture, Knowledge Management / Information Management (KM/IM)

Operational Intelligence and Training

Titania's training cadre provides a flexible combination of industry best practices and Department of Defense (DoD) instructional methodology using government approved instructional systems design models, automated tools, and a variety of Learning Management Systems. This approach identifies strengths and weaknesses, resulting in clear courses of action for sustained training success. Titania provides the DoD and the Intelligence Community with quality instruction and an agile ability to adapt to rapid changes in educational approaches while continuing to meet the needs for developing and sustaining highly competent, resilient, and adaptive DoD intelligence professionals.

Operational Intelligence & Training Related Services

- Provide a range of support across the TRADOC
 - Develop and integrate real-world scenario-based capstone problem solving events
 - Provide e-learning and sociocultural research analysis
 - Provide real-world data; transformation; and tailored individual and collective unit training solutions
 - Provide high-level analytical, operational, and programmatic support to Army Force Management activities
- Provide SMEs in all intelligence disciplines to support Army programs
- Develop and integrate business logic and complex visualization into Intelligence collaboration tools
- Support the USAICoE

About Titania

Founded in 2012, Titania delivers valued services to the Federal government in support of their most critical missions. In 2020, the company was acquired by Swish Data and operates as an independent business subsidiary. Titania professional services include Operational Intelligence and Training, Healthcare Information Technology, IT and Program Management, and Test and Evaluation Services.
